RAY UNITS

This partnership option may be explored to ensure that all patients have access to high-quality X-ray services in private-sector labs, irrespective if care is sought in public or private sector.

A. Eligibility criteria for Service Provider

- ◆ Service provider should be a registered entity (as defined in glossary).
- ◆ Should have a relevant license from state bodies/other relevant authorities.
- ◆ Should have qualified technicians to perform specific tests.
- ◆ Should have adequate infrastructure and equipment.
- ◆ Should be willing to undergo quality assurance process as per RNTCP guidelines.
- ◆ Should have the facilities to ensure proper biomedical waste management.
- ◆ Should have a licence from Atomic Energy Regulatory Board and should follow all safety measures as prescribed by the Board and fulfil the Original Equipment Manufacturer recommendations

B. Role of Service Provider

- ◆ Recruit adequate personnel.
- ◆ Undergo training if required and adhere to RNTCP guidelines.
- ◆ Maintain records and reports as given by RNTCP.
- ◆ Provide chest X-ray (free of cost) for all presumptive TB cases referred by the programme or from identified private-sector healthcare providers.
- ◆ Ensure real-time reporting in Nikshay.

C. Role of RNTCP

- ◆ Prescribe the specification for infrastructure and equipments (if required).
- ◆ Provide formats for records and reports.
- ◆ Ensure timely payments to Service Provider.

D. Performance indicator and its linkage to payment

- ◆ This is a fee for service contract i.e., payment will be based on the number of X-rays completed as per authorized doctors' prescriptions with results (and images, as feasible) updated in Nikshay.
- ◆ Deduct 20% from payment if time from the X-ray examination to reporting results in Nikshay is more than 24 hours.

E. Verification Mechanism

◆ The first level of verification will be completed by reviewing and cross-checking with Nikshay records and/ or any other RNTCP reports submitted for a defined period. Payments will be as per this verification

◆ The second level – physical verification may be undertaken by the District assigned personnel / agency and could include

Verification of records from lab registers.

Interview with 5% of TB patients who have availed services under this option.

Random checking of at least 5% of the X-rays images, where feasible.

◆ If discordance is found during the verification mechanism, the assigned penalties may be applied and may be adjusted in payments of subsequent quarter.

Note for consideration: Based on the local context, the partnership option could also account for report endorsement by a radiologist. It is desirable that all designated microscopy centres are co-located with X-ray centres to minimize patient inconvenience. Depending on the scale and number of X-ray laboratories engaged, RNTCP may budget for an additional Service Provider to set up a voucher system and manage reimbursements.
